1. ENGINE
Perkins four stroke heavy duty high performance industrial type diesel engine.

2. ENGINE FILTRATION SYSTEM
- Two Cartridge type dry air filters.
- Cartridge type fuel filter.
- Three Full flow lube oil filters.
All filters have replaceable elements.

3. TROPICAL COOLING RADIATOR
Radiator and cooling fan, complete with safety guards, designed to cool the engine at high ambient temperatures (consult your dealer for de-ration factors).

4. EXHAUST SYSTEM
Heavy duty Industrial Exhaust Silencer.

5. CIRCUIT BREAKER TYPE
3 pole ACB / MCCB (supplied disconnected and without cables)

ALTERNATOR DATA
Make: Leroy Somer
Model: TAL 049E
No. of bearings: 1
Insulation class: H
Total Harmonic Content: <5%
Wires: 6
Ingress Protection: IP23
Excitation System: SHUNT
Winding Pitch: 2/3 (n° 6S)
AVR Model: R150
Overspeed: 2250 min⁻¹
Voltage Regulation (steady): ± 1%
Short Circuit Capacity: -
PMG Excitation System Available as Optional.

CONTROL PANEL
Make: Deep Sea
Model: DSE7320

DSE7320 is an Auto Mains (Utility) Failure Control Module. It is operated via the START, STOP AUTO and MANUAL soft touch membrane buttons on the front panel. DSE7320 can be controlled remotely using either a GSM Modem, Ethernet via DSE860/865 or via RS485.

Protection:
- Fail to start
- Low oil pressure
- High engine temperature
- U/O Voltage shutdown
- U/O Frequency shutdown
- Underspeed, Overspeed
- Loss of engine speed detection
- High/Low battery voltage
- KW overload
- Unbalanced load
- Low fuel alarm (if fitted)
- Battery charger failure (if fitted)

(Please refer to DSE7320 brochure for more details)

AN INSPIRED DESIGN TO MEET YOUR NEEDS

POWERED BY:
We offer a range of optional features and accessories to tailor our generating sets to meet your power needs.

**OPTIONS**
- A variety of generating set control and synchronizing panels
- Additional protection alarms and shutdowns
- Water fuel separator
- Water jacket heater
- Battery charger

**ACCESSORIES**
- Genuine spare parts
- Load banks
- Auxiliary fuel tanks
- Manual & automatic transfer switches

For further information on all of the standard and optional features accompanying this product please contact your local dealer or visit [www.JubailiBros.com](http://www.JubailiBros.com)

---

**STANDARD SPECIFICATIONS**

6. **FUEL SYSTEM**
On Generating Sets up to 700 KVA, the baseframe design is incorporated with an integral fuel tank with a capacity of approx. 8 hours running at Full Load. The tank is supplied complete with fill cap breather, fuel feed and return lines to the Engine and drain plug.

7. **ALTERNATOR**
7.1 **INSULATION SYSTEM**
- The insulation system is Class H.
- All windings are impregnated in either a triple dip thermostetting liquid, oil and acid resisting polyester varnish or vacuum pressure impregnated with a special polyester resin.
- Heavy coat of antitracking varnish additional protection against moisture or condensation.

7.2 **AUTOMATIC VOLTAGE REGULATOR (AVR)**
The fully sealed Automatic Voltage Regulator maintains the Voltage Regulator at ±1%. Nominal adjustment by means of a trim pot incorporated on the AVR.

7.3 **MOTOR STARTING**
An overload capacity equivalent to 300% of the Full Load impedance at zero Power Factor can be sustained for 10 seconds, when PMG option is fitted.

8. **MOUNTING ARRANGEMENT**
8.1 **BASE FRAME**
The complete Generating Set is mounted as a whole on a heavy duty fabricated steel Baseframe.

8.2 **COUPLING**
The Engine and Alternator are directly coupled by means of an SAE flange. The Engine flywheel is flexibly coupled to the Alternator rotor.

8.3 **ANTI-VIBRATION MOUNTING PADS**
Anti-Vibration pads are affixed between the Engine / Alternator feet and the Baseframe thus ensuring complete vibration isolation of the rotating assembly.

8.4 **SAFETY GUARDS**
The Fan & Fan Drive along with the Battery Charging Alternator are Safety Guard protected for personnel protection.

9. **FACTORY TESTS**
- The Generating set is load tested before dispatch
- All protective devices control functions and site load conditions are simulated. The generator and its systems are checked before dispatch.

10. **EQUIPMENT FINISHING**
All mild steel components are fully degreased and painted with powder coated paint to ensure maximum scuff resistance and durability.

11. **DOCUMENTATIONS**
Operation & Maintenance manual, Circuit wiring diagrams and Commissioning / Fault Finding instruction leaflets are accompanied with the Generator.

12. **QUALITY STANDARDS**
The equipment meets the following standards: BS4999, BS5000, BS5514 IEC 60034, VDE0530, NEMA MG 1.22 and ISO 8528.

13. **WARRANTY**
All of the Generating Sets are covered under a warranty policy for a period of 12 months. Warranty of the equipment is in line with manufacturers warranty terms & conditions. (check warranty statement for more details, as it may vary for different countries)

In line with continuous product development, we reserve the right to change specifications without notice.

---

**RATINGS DEFINITION**

**Prime Power**
These ratings are applicable for supplying continuous electrical power (at variable load) in lieu of commercially purchased power. 10% overload power is available for 1 hour in 12 hours continuous operation.

**Standby Power**
These ratings are applicable for supplying continuous electrical power (at variable load) in the event of a utility power failure. No overload is permitted on these ratings.

**STANDARD REFERENCE CONDITIONS**

Output ratings are presented at 25°C air inlet temperature, barometric pressure 100 kPa, relative humidity 30%. This generating set is designed to operate at high ambient temperatures (up to 55°C), humidity (up to 99%) and higher altitudes. De-rating may apply, please consult your dealer for specific site ratings.

Some of the specifications are not standard on all Genset models.
