

The sound attenuation of JET Generating sets is acquired with enclosures customized to allow easy access to the engine for maintenance operations. The careful design ensures the lowest noise level using high density sound absorbing material and highly effective aeration system. These enclosures are a result of extremely rugged construction in order to withstand the rough handling common on different sites. They are designed on modular principles with many interchangeable components permitting on site repair.

JET sound-attenuated and weather-protective enclosures are manufactured from galvanized steel sheet (polyester powder painted for rust proof protection). The heavy duty silencer is mounted internally for enhanced performance.

Enclosures pictured may include optional accessories.

“High quality and heavy duty enclosures are built in various models for different applications. Customized solutions are also available as per customers requirements.”

Robust /Highly Corrosion Resistant Construction:

- Stainless steel locks and hinges
- Body made from galvanized steel components (2.0mm) treated with polyester powder coating

Convenient Access for Maintenance:

- Full length extra wide doors on each side
- Radiator fill access plate
- Vertical hinged side door 180° opening rotation
- Back door option also available

Transportability:

- Tested and certified single point lifting facility
- Dragging points at base frame

Security and Safety:

- Control panel viewing window in a lockable access door
- Emergency stop push button (red) fixed externally for quick access
- Cooling fan and battery charging alternator fully guarded
- Fuel fill and battery can only be reached via lockable access doors
- Exhaust silencing system totally enclosed for operator safety

Sound Pressure Level:

- 80 - 85 dBA at 3 meters (standard)

Customized enclosures with reduced Sound Pressure Levels available on demand
